PHARMACOLOGICAL REVIEWS

VOLUME 18

1966

Acid, free fatty. *See* Free fatty acid
Adenylate, cyclic 3′,5′-, gluconeogenesis stimulation from lactate, in rat liver, 181
Adipose tissue
  cyclic 3′,5′-AMP and lipolytic effects of hormones, 237
  effects of glucose deprivation on sympathetic outflow, 303
Adrenal medulla
  catecholamines, release, 471
  effects of glucose deprivation on sympathetic outflow, 313
Adrenergic activation, by anticholinesterases, 799
  blockade in cardiovascular disease, 701
  endings and vesicles, isolated from brain, 413
  function, surgical sympathectomy, 611
  mechanisms in nervous system, 713–803
  modulation of ganglionic transmission, 743
  nerve function, methyldopa, 569
  neurons, drug interactions, 577
  receptors, pharmacological characterization, 503
  synapses
    central, 717
    junction potentials, 481
  transmission, 459–540
  tissues, properties, 365–458
Amine,
  aromatic, biochemical production of ferrihemoglobin-forming derivatives, 1091
  biogenic, formation and metabolism, methylation reactions, 95
  oxidases, and histaminase, 1163
  sympathomimetic, supersensitivity and subsensitivity, 629
  indirectly acting, 551
AMP, cyclic 3′,5′-
  lipolytic effects of hormones on adipose tissue, 237
  role in responses to catecholamines and other hormones, 145
Angeletti, Pietro U. *See* Levi-Montalcini and Angeletti, 619
Anthelmintic effects and biochemical and physiological mechanisms, relationships, 871
Anticholinesterases, adrenergic activation, 799
Aromatic amines. *See* Amines
Ascorbate and dopamine-β-hydroxylase, 61
Atropine and related compounds, behavioral and electroencephalographic effects, 965
Autonomic ganglia synaptic mechanisms, modification by drugs, 839
Axelrod, J. *See* Glowinski and Axelrod, 775
Axelrod, Julius, Methylation reactions in the formation and metabolism of catecholamines and other biogenic amines, 95

Bacq, Z. M. Summary of discussion and commentary, 313
Baldessarini, Ross J. *See* Glowinski and Baldessarini, 1201
Banks, P., and Blaschko, H. Chromaffin tissue, 453
Behavioral effects of atropine and related compounds, 965
  and electrophysiological effects of catecholamines, 753
Belleau, B. Steric effects in catecholamine interactions with enzymes and receptors, 131
Bertler, A., Falck, B., Owman, Ch., and Rosengrenn, E. The localization of monoaminergic blood-brain barrier mechanisms, 369
Bertler, Åke, and Rosengren, Evald. Possible role of brain dopamine, 769
Biochemical mechanisms and anthelmintic effects, relationship, 871
Biological assay, estimation of catecholamines, 317

Biosynthesis,
catecholamine, endogenous, inhibitors, 599
catecholamines, in insects, 89
norepinephrine, inhibition at dopamine-β-hydroxylation stage, 77
Bizzi, A. *See* Garattini and Bizzi, 243
Blaschko, H., Chairman. First Session, Section I: Enzymology, 39–84
Introductory remarks, 39
See Banks and Blaschko, 453
Blood and tissue changes induced by norepinephrine stimulated mobilization of free fatty acids (title only; no manuscript supplied), 242
-brain barrier mechanisms, monoaminergic, localization, 369
Boullin, D. J. *See* Costa *et al.*, 577
Brain
adrenergic endings and vesicles, isolated from, 413
dopamine, possible role, 769
function and dopamine (3-hydroxytyramine), 925
rat, H^3-norepinephrine, effect of drugs, 775
Brand, J. J., and Perry, W. L. M. Drugs used in motion sickness. A critical review of the methods available for the study of drugs of potential value in its treatment and of the information which has been derived by these methods, 895
Braunwald, Eugene. *See* Chidsey and Braunwald, 685
Brodie, B. B., Davies, J. I., Hynie, S., Krishna, G., and Weiss, B. Interrelationships of catecholamines with other endocrine systems, 273
Brodie, B. B. *See* Costa *et al.*, 577
Brody, T. Summary of discussion and commentary, 253
Bueding, E. Summary of discussion and commentary, 211
See Saz and Bueding, 871
Buffoni, F. Histaminase and related amine oxidases, 1163
Burn, J. H., Chairman. Section V: Adrenergic Transmission, 459–540
Introductory remarks, 459
Burnstock, G., and Holman, Mollie E. Junction potentials at adrenergic synapses, 481
Butcher, R. W. Cyclic 3′,5′-AMP and the lipolytic effects of hormones on adipose tissue, 237

Calcium, effect in depolarized rat uterus, 495
Carbohydrate metabolism, 145–213
Carcinogenesis, chemical, mechanisms, 805
Carcinogens, proximate, nature and interactions with macromolecules, 805
Cardiovascular disease, adrenergic blockade, 701
effects of monoamine oxidase inhibitors, 705
Carlson, L. A. Blood and tissue changes induced by norepinephrine-stimulated mobilization of free fatty acid, (title only; no manuscript delivered), 242

Cass, Rosemary, Obituary, 6
Cathecholamines
assay, newer developments, 325
behavioral and electrophysiological effects, 753
biological assay, 317
biosynthesis, endogenous, inhibitors, 599
biosynthesis in insects, 89
cholinesterases and, demonstration in same section, 353
circulatory system and, 645–711
cold adaptation, role, 291
cyclic-3′,5′-AMP in responses, 145
-drug interactions in man, 673
fat mobilization and metabolic consequences, 217
fluorescence microscopy, methodology, 351
formation and metabolism, methylation reactions, 95
hypertension and, 667
influence on heart function and phosphorylase activity, 197
interactions with enzymes and receptors, steric effects, 131
metabolic effects, 145–314
in neuropsychiatric states, 787
other endocrine systems and, interrelationships, 273
physiological interrelationships, 255–314

-producing tumors other than pheochromocytoma, 659
related compounds and, measurement and detection, 315–364
release from adrenal medulla, 471
second symposium, 1–803
-secreting tumors, chemistry and pharmacology, 645
storage particles in central nervous system, 401
stores, pharmacological depletion, 541
Central nervous system
catecholamine storage particles, 401
metabolism of norepinephrine, 1201
Chemical carcinogenesis, mechanisms, 805
Chidsey, Charles A., and Braunwald, Eugene. Sympathetic activity and neurotransmitter depletion in congestive heart failure, 685
Cholinesterases
Anti-. *See* Anticholinesterases
catecholamines and, demonstration in same section, 353
Cholinoreceptors of locomotor muscles, disposition in evolution, 1051
Chromaffin tissue, 453
Circulatory system, catecholamines and, 645–711
Coenzyme
dopa decarboxylase, 53
hydroxylases and, 61
Cold adaptation, catecholamines, role, 291
Cooper, Theodore. Surgical sympathectomy and adrenergic function, 611
